UNMAI Carbon Singapore launches Legacy CERs Platform to extend the utility of UNFCCC CDM Certified Emission Reductions

Singapore, 28 September 2026 ? UNMAI Carbon Solutions Pte. Ltd. today announced the launch of its Legacy CERs Platform, a registry designed to document the provenance and subsequent re-issuance, transfer and retirement of eligible legacy Certified Emission Reductions (CERs) originally issued under the UNFCCC Clean Development Mechanism (CDM). The first batch of legacy CERs were issued from an Indian Grid Connected Wind Power Project managed by Viviid Green Private Limited, India. (https://legacycers.unmaicarbon.earth/legacy-cers-projects)

The launch comes as CDM registry transactions approach their final deadline. Under decision 4/CMP.20, transfers to the Article 6.4 mechanism registry, cancellations and other CDM registry transactions must cease by 31 December 2026. The registry will complete residual administrative operations after the cancellation of certain unpaid CERs in pending accounts on 1 July 2027. UNFCCC guidance advises account holders to submit cancellation requests by 25 November 2026 to allow processing before year end.

The UNMAI Carbon Legacy CERs Platform enables project owners and authorised custodians to register organisations and projects, submit CDM project and issuance documentation, and request re-issuance of corresponding Legacy CERs after the underlying CERs have been voluntarily cancelled in the CDM registry and the evidence has been reviewed. Legacy CERs Platform administrator approves project documents, issuance requests and subsequent transfers or retirements. The platform maintains an activity trail, tracks available balances and serial ranges, and provides downloadable transfer and retirement certificates.

?The CDM represents years of verified mitigation activity and investment. Our immediate priority is to give holders a clear, documented route to preserve the provenance of eligible CERs and manage their subsequent voluntary use,? said Yuvaraj Dinesh Babu, Founder and CEO of UNMAI Carbon Solutions. ?Each applicant must establish its authority over the credits and provide the underlying CDM records before issuance on our platform. The participation fees are linked to transaction except a small project onboarding fee?, he added.

?The CDM Registry is closing on 31st December, so naturally, we started thinking about extending the life of our CERs and how we could preserve their value. We found UNMAI Carbon Legacy CER Platform very timely and innovative,? said Dhruv Kohli, Viviid Green Private Limited. ?We are happy to be its first member to have issued the first batch of Legacy CERs from our wind power projects portfolio. We look forward to this collaboration and wish UNMAI Carbon?s Legacy CERs Platform the very best?, he added.

UNMAI Carbon plans to develop an optional project integrity ranking to help users distinguish between credits with different characteristics. It is also working on potential tokenisation and marketplace integration as separate future phases. A Legacy CER issued on the platform is a distinct, privately issued unit supported by evidence of the original CDM CER and its cancellation; it is not a UNFCCC issued CER or an Article 6 authorised unit. Any claim based on a retired unit remains subject to the buyer?s applicable accounting and claims rules.

Project owners and custodians can learn more at https://legacycers.unmaicarbon.earth Account opening and issuance are subject to UNMAI Carbon Legacy CERs Platform?s eligibility review, documentation requirements and applicable fees.

About UNMAI Carbon Solutions

UNMAI Carbon Solutions Pte. Ltd. is a Singapore-headquartered global climate advisory and solutions firm engaged in unlocking high-integrity carbon markets. The firm is aligned across three core pillars: net zero transition and climate policy advisory, climate finance and investment strategy, and digital carbon market infrastructure and governance.

UNMAI Carbon Solutions supports governments, Bilateral & Multilateral Development Institutions and Banks, and carbon market stakeholders across Asia, Africa, the Middle East, and other regions on operationalization of domestic carbon mechanisms and Paris Agreement - Article 6, decarbonization advisory, climate finance, carbon advisory & trading solutions, and digital innovation.

UNMAI?s operating philosophy is rooted in Truth, Transparency, Traceability, and Integrity, reflecting its commitment to credible decarbonization, robust market systems, and trusted climate action.
